

Elval

Company

profile

About us

Elvar was founded in Dubai in 2024 with one clear purpose: to fix the inefficiencies in the regional fresh food supply chain — and to do it with technology, transparency, and trust.

We are a UAE-based agri-tech company specializing in the sourcing, production, and distribution of premium fresh fruits, vegetables, and herbs. Integrating AI-driven farming, IoT-powered monitoring, and sustainable supply chain practices, Elvar delivers consistent quality — from the soil to the shelf — to businesses across the UAE and the wider MENA region.

We don't just supply produce. We build supply chain partnerships that help hotels, supermarkets, restaurants, and food distributors operate with greater confidence, speed, and reliability

“Currently serving clients in the hotel and retail sectors across Dubai”

Vision

To be the UAE's most trusted farm-to-business fresh produce partner — setting the regional benchmark for quality, sustainability, and supply chain transparency across MENA.

Mission

To deliver a diverse selection of high-quality fresh and packaged produce using sustainable agriculture, AI-powered production, and efficient logistics — ensuring product safety, exceptional customer experience, and measurable environmental responsibility.

Elvar products

All Elvar products are grown under monitored agricultural conditions and handled through a fully traceable cold-chain process — ensuring peak freshness at every delivery point.

Don't see what you need? We source any agricultural product upon request — just ask.

“All products comply with UAE Food Safety authority requirements”

Sustainability & Technology

At Elvar, sustainability is not a marketing claim — it's the foundation of how we operate. Every decision, from seed selection to last-mile delivery, is made with environmental responsibility in mind.

AI Farming

AI-monitored crop conditions for consistent yield and quality year-round.

IoT Monitoring

Real-time sensors tracking soil health, temperature, and moisture.

Renewable Energy

Production lines powered by clean energy to minimize carbon footprint.

Smart Logistics

Optimized routing and cold-chain management to reduce waste and emissions.

Why choose Elvar?

Here is what sets us apart from every other produce supplier in the region:

- **Speed You Can Count On:** Farm-to-delivery within 24 hours across the UAE, with a cold-chain process that preserves freshness at every step. Backed by a full quality guarantee — if our standards aren't met, neither is your invoice.
- **Technology-Backed Quality:** AI and IoT systems monitor growing conditions continuously — so every batch meets the same high standard, every time.
- **One Supplier, Full Range:** Fruits, vegetables, and herbs — sourced, packed, and delivered under one roof. Fewer vendors, less complexity.
- **Built on Sustainability:** Renewable-powered production, optimized logistics, and eco-conscious practices — because your supply chain should be as responsible as your business.
- **True Partnership Model:** Dedicated account support, after-sales programs, and a commitment to sourcing any product you need — even if it's not on our standard list.
- **Full Traceability:** Every product is traceable from origin to delivery — giving your team complete visibility and compliance confidence.

Who We Serve?

Elvar is the preferred supply partner for B2B clients across the food and hospitality ecosystem in the UAE and MENA:

Hotels & Resorts

Consistent daily supply of premium fresh produce to meet 5-star standards.

Supermarkets & Retailers

Reliable sourcing and packaging tailored for shelf-ready display.

Restaurants & Catering

Flexible volumes, custom cuts, and on-demand specialty herbs.

Food Distributors

Bulk supply with traceability documentation and logistics support.
